

RDA / EOSC Future Ambassador: "Ask Me Anything" style events on FAIR implementation and Open practices in Science

What:

The aim of this project is to deliver a series of "Ask Me Anything"-style events featuring keynote speakers from the RDA and EOSC groups focused on RDA activities and EOSC solutions in relation to FAIR implementation and Open practices in Science.

The events will bring together speakers from the RDA Groups and speakers from a related EOSC service to

describe how their work aligns, how it connects to the research community, and how it benefits the research community in a way that is directly related to the implementation of FAIR and Open research practices.

The sessions will begin much like a traditional presentation, with the expert speakers presenting short, 5-minute talks about their work. One or two moderators will run the sessions, which will be laid-back and easy to understand. Questions will come from both the moderators and the audience. Finally 2-3 questions gathered and answered by experts will be turned to Google Educational Q&A Flash cards.

Who:

Sara El-Gebali is the co-founder of FAIRPoints

Scientific Domain:

FAIR Data Implementation

Your Promotion and Networking:

Sara and her activities are also [featured on the RDA website](#).
