

REPOPSI

What:

REPOPSI is an open digital repository for psychological research instruments, such as questionnaires and tests, established and maintained by the Laboratory for Research of Individual Differences at the University of Belgrade Faculty of Philosophy in Serbia. By implementing RDA recommendations and other outputs, this project aims to improve REPOPSI's TRUSTworthiness as well as the FAIRness of its (meta)data. The project focuses on building the Repository's technologies needed to improve its adherence especially to the principles of User Focus, Sustainability, Findability, and Interoperability. Dissemination and community activities are designed to promote further uptake of RDA outputs.
